CUSTOM AXLE ORDERING TERMS

1. Custom Axle orders cannot be cancelled or changed after machining begins.
2. Custom Axles are only machined on the working day closest to the 15th and last day of the month. Custom Axle orders must be placed at least one business day ahead of machining days in order to be included in the current production run. Contact Customer Service for shipping ETA.
3. Custom Axles must be 100% paid for at the time of ordering. Custom axles are shipped separate from standard product orders and may incur an additional shipping charge. Contact Customer Service for shipping quotes.
4. Due to the varied manufacturing tolerances among different axle component manufacturers, the spline fit of our axles with other components (e.g. yokes) may be slightly tighter or looser than fits with other axles.
5. No warranty is provided on Custom Axles. Returns are not accepted on Custom Axles.
6. The customer is solely responsible for determining the length of their Custom Axle.
7. There are no exceptions to these terms.

By signing below, I agree to the Custom Axle Ordering Terms.
